This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2009 in the subject Business economics - Economic Policy, grade: 1,0, University of Frankfurt (Main), course: Financial Regulation, 56 entries in the bibliography, language: English, abstract: This paper deals with the terms entry regulation, financial market competition and also indicates connections to potential financial crises. Authors in research have been attempting for years to build up a remedy for an optimal set-up. 1 So, this is the reason I observe a seemingly never-ending discussion between two unofficial parties: Neither the proponents of the concentration-stability view, neither those of the concentration-fragility view will retreat from how to install proper competition in order to ensure stability. This paper also aims to understand the terms of both parties; their arguments and whether either monopolistic structures or competition are desirable in the financial industry. Therefore, I lay the theoretical foundation. I demonstrate with a model of the authors Boyd & De Nicoló that even economies with monopolistic structure are exposed to risk-taking activities - and not only banks in competitive industries. In chapter 3, I turn to...
