REGULATION OF TRANSCRIPTION AND TRANSLATION IN EUKARYOTES

DOWNLOAD

Springer Mrz 2012, 2012. Taschenbuch. Book Condition: Neu. 203x133x19 mm. This item is printed on demand - Print on Demand Neuware - This volume represents the proceedings of the 24th Mosbach Colloquium on 'Regulation of Transcription and Translation in Eukaryotes' which was held April 26-28, 1973, in Mosbach, Germany, under the auspices of the Gesellschaft für Biologische Chemie. To the three of us (H. KERSTEN, P. KARLSON and myself) who were commissioned with the invitation of speakers, it was a difficult decision as to whether we should attempt to cover with some twenty contributions as many aspects of this broad topic as possible, or to sacrifice the intellectually perhaps more pleasing but more speculative concepts and to concentrate on a few aspects of gene expression in reasonable detail. We unanimously decided on the latter course, leaving such important and timely topics as for example, hormone action, cyclic AMP and reverse transcription to the proceedings of other symposia, and concentrating on the four questions which are most basic to an understanding of the mechanisms of transcription and translation and for which fragmentary but nonetheless reliable experimental results have become available within the last few years. These are the structure of chromatin, the synthesis of messenger RNA, the structure of the active ribosome, and the role of initiation factors in protein synthesis. 368 pp. Englisch.
